Introduction to Digital health

Design and Implementation of Digital Health Interventions

Evaluation of Digital Health Interventions

IMPERIAL

Jun 20, 2025

Bhanuja Kumar

has successfully completed the online Specialization

Digital Health

This specialisation introduces students to the emerging and multidisciplinary field of digital health and the role and application of digital health technologies including mobile applications, wearable technologies, health information systems, telehealth, telemedicine, machine learning, artificial intelligence and big data. These digital health technologies are assessed in terms of their opportunities and challenges to address real-world public health and health care system challenges in order to improve the quality, safety and efficiency of these services. The aim of this specialisation is to prepare learners for the new era of digitalisation in public health and health care globally.

Ana Luisa Neves
Senior Clinical Lecturer
& Director of Global
Digital Health Unit
School of Public Health

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
